11/02	4/03	\$1,245,000	U.S.A.C.E	Belfast, ME	Robert Casoli	978- 265-5826
1/02	2/02	\$105,000	Resco/ Waste Mgt	Saugus MA		
10/00	4/02	\$1,700,000	U.S.A.C.E	Union River ME	Robert Casoli	978-265-5826
12/00	12/01	\$1,100,000	MASS D.E.M.	Wellfleet hbr. MA	Bill Cavanaugh	
10/99	11/01	\$1,400,000	MASS D.E.M.	Winthrop MA.	Nancy Thorton	
05/00	07/00	\$550,000	U.S.A.C.E.	Block Island, RI	Maurice Beaudoin	508-990-2550
10/ 98	10/99	\$1,240,000	U.S.A.C.E.	Cohasset MA.	Maurice Beaudoin	508-990-2550
10/97	4/98	\$648,000	N.H. Dept Transportation	Seabrook N.H.		
1/97	2/97	\$248,000	MASS D.E.M.	Back creek Weymouth, MA	Nancy Thorton	
3/96	5/96	\$700,000	U.S.A.C.E	York Harbor, ME	Bill Haines	
1/95	6/95	\$760,000	U.S.A.C.E	Chatham, MA	Scott Lenord	
1/95	6/95	\$139,000	MASS D.E.M	Hodgkin's Cove, MA	Gene Cavanaugh	
11/94	2/95	\$420,000	U.S.A.C.E.	Perkins Cove, ME	Scott Lenord	

10/92	12/92	\$266,000	U.S.A.C.E	Biddeford Pool, ME	Scott Lenord	
5/91	5/91	\$27,000	U.S.C.G.	Merrimac River, MA	Joseph Tully	401-829-0835

Other Marine Projects

Start date	Finish date	Contract value	Owner	Project name/ Description		
6/25/11	7/11	\$70,000	Skanska/Riverside Pickering	Towing Boston to VA to Boston	Chip Tacetta	603-765-6875
3/10	Company Owned		Spud Barge “Trinity”	Towing Norfolk to Boston	Chip Tacetta	603-765-6875
7/09	Company Owned		Building of Push Boat “Strider		Craig Burnham	978-745-1788
7/08	7/10	\$248,600	Robert & Rachel Lutts Trust	Pier	Dan Lynch	781-631-6145
7/07	Company Owned		Dump Barge “742”	Towing Albany to Boston	Craig Burnham	978-745-1788
1/06	3/06	\$547,689	Duke AGT	Seabed Maintenance	David Neal	617-560-1216
12/04	2/05	\$1,965,000	Duke Energy	Seabed Restoration on natural gas pipeline	David Neal	617-560-1216
6/04	9/04	\$82,000	Diversified Automotive	Wharf and dock repair	Dennis Kraz	617-241-9977
7/04	1/05	\$256,000	City of Lynn	Marina float system repair	Richard Mageary	781-586-8120
8/03	8/03	\$66,000	U.S.A.C.E	Sunken wreck removal	Maurice Beaudoin	508-990-2550
7/02	Company Owned		Towing barge from VA to MA		Ted Augustine	978-745-1788
7/02	Company Owned		Towing YSR Barge (110’x34’x11’)		Ted Augustine	978-745-1788
4/95	6/95	\$378,000	National Park Service	Sea wall complex		
12/94	2/95	\$148,500	N.E. Power	Tower Foundation rehab		
1/94	3/94	\$38,000	U.S.C.G.	Boston light pier repair	Joseph Tully	401-829-0835
7/92	8/92	\$168,000	U.S.C.G.	Wharf and dock repair	Joseph Tully	401-829-0835
3/88	3/89	\$90,000	Max Callahan	Bulkhead repair		
2/87	4/87	\$46,000	PB Johnson	Dam repair		
10/87	1/88	\$274,000	City of Lowell	Akin St. bridge repair		

Recent Projects with Special Environmental Considerations.

Wreck Removal of F/V Kris Schell from Annisquam River Gloucester MA. The USACE contracted with Burnham to remove a derelict fishing vessel that had been found to contain TASCAs levels of PCB’s. The vessel was stabilized, righted, and floated. It was then towed down river. To a shipyard for demolition. The wreckage was reduced and loaded into watertight roll off containers for disposal.

Maintenance dredging of Pawtuxet cove in Cranston and Warwick Rhode Island. The upper reaches of Pawtuxet cove were found to contain a variety of contaminants, but primarily hydrocarbons related to fuels. The project owner USACE required the use of an Environmental bucket .on the project.

Old Colony Yacht Club. Permits for the dredging of Old Colony Yacht club required the use of an Environmental bucket, a silt curtain and constant turbidity monitoring. This was due to the project site being one part of a much more heavily contaminated site owned by then KeySpan, now National Grid.

Maintenance dredging of Riverview Marina Danvers MA. Although suitable for offshore disposal the permits for the dredging of Riverview Marina included requirements for Closed environmental buckets, turbidity curtains and turbidity monitoring.

CAD Cell Construction for the New Bedford Harbor Commission. This was undertaken in June and July of 2008 with emphasis on minimizing water column particulate as it contained low levels of PCB’s. Spoils were dredged and loaded into scows and held for up to 72 hours before being allowed for disposal into another CAD Cell. Debris that was encountered was selectively extracted from the spoils and disposed of on shore in role on dumpsters.

Maintenance dredging, Old Saybrook, CT, USACENED, with special capping procedures for Central Long Island Disposal site. Project involves the dredging and removal of 200,000 cu. yds. of clean mud from the North Cove. 75,000 cu. yds. of this material will ultimately be disposed of at CLIDS. This capping material culminates the season’s dredging throughout Connecticut and New York with clean dredge material. Contacts for these projects can be found in the experience summary.
